

Site guide...

The site provides citizens with transportation, freight, and rental of transport vehicles and heavy equipment.

The site is divided into three main sections:

A- Section One: Transport and Leasing Section Transportation: If you have a commodity such as horses, apples, sheep, goods, machinery, vehicles, trucks, fruits, vegetables and food, the platform provides you with a flatbed carrier, a winch or a racket..etc.

Rental section with or without driver: for the rental of heavy equipment and various tools and equipment such as plant cutting machines - compressors - plows - distributors and other various equipment.

B - 1- Private ride transportation service: The service includes booking a private car to transport your goods.

2- Combined transportation service: If more than one service provider is needed at the same time, or if it needs to be shared with another person to save transportation and transportation expenses in a shorter time.

3- Customers' transportation requests service: If you have goods and you want to transport them and you do not find the appropriate means of transportation, you can present your request and the drivers heading to the same destination or customer will contact you and participate with you in transporting to the same destination, and thus have a lower transportation cost.

Registration method:

Choose a new registration and follow the instructions to be able to access the service you need. You enter the desired section and then a window opens for you to register the required data, and you can add vehicles according to your need.
